

Dear Sir, The NAB Petition 04-160 is designed to harm consumers and protect incumbent broadcasters from competition. As I travel the county, the availability of Satellite Radio, such as XM, has provided invaluable information on traffic and weather events. When you travel outside your local area, the ability to receive indepth information regarding traffic and weather conditions is a unique and valuable safety tool for XM users. I urge you to deny the NAB's position and help reinforce the need for competition and availability in the best interest of the consumer.
